

Time to kick off our new web site on this 4th of July 2016

New Web Site and Club Management Software

The club has subscribed to a club management software package and data base from Wild Apricot which will allow for more streamlined functions such as: memberships, member profile information, event management, online payment with PayPal or credit cards and integration of these functions on a new website. Your names, email addresses, home address, etc. that were in our old system have been uploaded to the new system.

As of 7-4-16 the new web site is: goldturners.org

Once at the site you will see a sign in area in the upper left blue area. Sign in is required if you want to view the members only section and if you want to update your profile information.

To sign in: enter your email address and click "forgot password" (leave the password box blank). In a few minutes you will get an email telling you how to establish your password.

Once signed in, one of the first things you should do is verify or update the information in your profile.

To update your profile: click on "view profile" in the upper left blue area. Then click edit profile and update your profile information.

Possible problems with sign in:

-
- The email address you entered is not the same as the one from our past records. Solution, email your correct email address to membership chairman Jim Cochran.
- You entered a password in the password blank. Solution, you should eventually see a forgot password or reset password button.
- None of the above work: call (530-582-8521) or email Ed Larson.
